About this manual template:

This is a very reduced template, made for projects with up to 3 TOC levels only. Page numbering is generally defined in the MasterBackground section.

The table of contents intentionally just prints 3 levels (4 to 6 are simply ignored) and does not use chapter numbering. Page reference numbers in the table of contents are printed before the heading, for design reasons. The TOC does print page numbers at the bottom (enable Masterbackground for the TOC, if you want that).

The topics section prints the current top-level chapter at the top of the page. Sub-chapters are printed with TOC headings, but again without chapter numbering.

If you are going to use this template, please open the with the Manual Designer and save it under a new name. You can delete this text in your personal copy.
